Author Index 2005

Abdul Gaffar, M S	Experimental study of an aqueous desiccant mixture system: air dehumidification and desiccant regeneration	669
Ainsworth, R W	Blade-tip heat transfer in a transonic turbine	421
Al-Farayedhi, A A	Experimental study of an aqueous desiccant mixture system: air dehumidification and desiccant regeneration	669
Al-Hajeri, M H	A parametric study of filtration through a ceramic candle filter	77
Anker, J E	The impact of rotor labyrinth seal leakage flow on the loss generation inan axial turbine	481
Antar, M A	Experimental study of an aqueous desiccant mixture system: air dehumidification and desiccant regeneration	669
Antonelli, G	Epitaxial repair and *in situ* damage assessment for turbine blades	93
Aroussi, A	A parametric study of filtration through a ceramic candle filter	77
Arts, T	The dual thin-film probe for high-frequency flow temperature measurements	461
Asuaje, M	Computer-aided design and optimization of centrifugal pumps	187
Atkin, R J	Analysis of a smart clutch with cooling flow using two-dimensional Bingham plastic analysis and computational fluid dynamics	639
	Modelling the flow of an electrostructured fluid in transient operation	61
Bagshaw, D A	An experimental study of reverse compound lean in a linear turbine cascade	443
Baker, N J	Direct drive electrical power take-off for offshore marine energy converters	223
Bakir, F	Computer-aided design and optimization of centrifugal pumps	187
	Influence of peripheral blade angle on performance and stability of axial inducers	289
Beheshti, B H	Performance enhancement in transonic axial compressors using blade tip injection coupled with casing treatment	321
Bellettre, J	Effect of water and methanol fractions on the performance of a CI engine using animal fat emulsions as fuel	583
Biswal, S K	Thermodynamic analysis of a coal gasification and split Rankine combined cogeneration plant. Part 1: energy analysis	169
	Thermodynamic analysis of a coal gasification and split Rankine combined cogeneration plant. Part 2: exergy analysis	179
Bohn, D E	Algebraic method for efficient adaption of structured grids to fluctuating geometries	303
Bram, S	Status of external firing of biomass in gas turbines	137
Bullough, W A	Analysis of a smart clutch with cooling flow using two-dimensional Bingham plastic analysis and computational fluid dynamics	639
	Modelling the flow of an electrostructured fluid in transient operation	61
Canepa, E	Wake–boundary layer interaction on the vaned diffuser of a centrifugal stage	401
Casey, M V	The impact of rotor labyrinth seal leakage flow on the loss generation inan axial turbine	481
Casey, M	Experimental investigations of rotating flow instabilities in the last stageof a low-pressure model steam turbine during windage	499
Casleton, K H	CO_2 and H_2O diluted oxy-fuel combustion for zero-emission power	121
Cattanei, A	Wake–boundary layer interaction on the vaned diffuser of a centrifugal stage	401
Chan, A L S	Energy performance of a solar hybrid collector system in a multistory apartment building	1
Chen, L	Performance comparison of an irreversible closed variable-temperature heat reservoir Brayton cycle under maximum power density and maximum power conditions	559
Chen, C-K	Application of exergy method to an irreversible inter-cooled refrigeration cycle	661
Chen, R	A polymer electrolyte membrane fuel cell model with multi-species input	255
Chorpening, B T	CO_2 and H_2O diluted oxy-fuel combustion for zero-emission power	121
Chow, T T	Energy performance of a solar hybrid collector system in a multistory apartment building	1
Chu, W	Numerical and experimental investigation of stepped tip gap effects on a subsonic axial-flow compressor rotor	605
Chung, M K	Improved momentum exchange theory for incompressible regenerative turbomachines	567
De Ruyck, J	Status of external firing of biomass in gas turbines	137
De, S	Thermodynamic analysis of a coal gasification and split Rankine combined cogeneration plant. Part 1: energy analysis	169
	Thermodynamic analysis of a coal gasification and split Rankine combined cogeneration plant. Part 2: exergy analysis	179
